INTRODUCING

ICDEFI Decentralized

A Cross-Chain Liquidity Aggregation Protocol

ICDEFI FINANCE LABS

- We are a team of DeFi builders in Australia who wants to build an ecosystem of DeFi products that helps traditional finance users to access to DeFi services much easier
- In 2021, we built ICDEFI Wallet as our first product for few reasons:
  - Wallet is the core component of any blockchains
  - We believe that a multi-chain wallet engine is the core component of future multi-chain/cross-chain protocols as well
  - A multi-chain wallet engine will help the protocols/dapps to bring a better user experience and better control of product implementation process
  - As we realized, people are normally use different protocols/dapps for the same need but they are likely to stick with only one wallet app. The multi-chain wallet engine can become the moat factor of our future products.
- We are ready to ship our next product: **ICD TOKEN**

IC DEFI

ICDEFI Decentralized

DeFi is the future, there is no doubt about it. And DEX will be playing a big role in DeFI. However, there are certain issues with our current DEX market, with sustainable liquidity and ease of use are biggest challenges. ICDEFI Decentralized aims to break these limits and bring DeFi to as many users as possible.

ROAD MAP

Stage 1:
- Building a global ICD Coin ecosystem platform
- Build social channels Facebook, Twitter, Instagram, Telegram, Discord, Youtube, Support Channel...
- Officially open sale and launch ICD platform globally through Seed Round, Private Sale, Presale...

Stage 2:
- Cooperating with reputable auditing units Certik, CTDsec, Techrate...
- Developing ICD on DEX/Swap/Farm/Staking
- Listing on PancakeSwap and 2 international DEXs

Stage 3:
- Research and development on NFT technology on Defi platform of ICD
- Research and development MarketPlace to buy and sell and develop NFTs in the form of artificial intelligence – users can create their own AI through the ICD platform
- Launching ICD's Android and IOS App platforms

Stage 4:
- List ICD on major international P2P exchanges like Binance, Huobi, Gate.io
- Links to put ICD coins on crypto news sites like CoinMarketCap, Coinnomi, LiveCoinWatch
- Research and optimize technology for virtual reality games and artificial intelligence

Stage 5:
- Launching a financial game called ICDgame community in this game where we can join and build our own investment business, and completely on ICD's NFT platform
- Establishing representative offices in multinationals
- Focus on developing charity fund and fund for global artificial intelligence technology research through auctions and patents

Stage 6:
- Bringing Community game ICD games to major distribution platforms such as Egame, Xbox, Play Station
- Develop more study promotion funds, support people who are passionate about technology and science to be able to study and develop methodically
- Organize art exhibitions and art exhibitions around the world
